

LAN Hotel and Spa by The Orangeblowfish + Red Design

posted by Yao on 2018-09-13

Lan Hotel and Spa is a 228-room boutique hotel for global travelers with an interest in winter sports and resort design. The hotel's architecture, led by Shanghai-based architects red design, draws inspiration from the geological strata of the volcano after which Changbaishan is named.

As the branding agency for Lan Hotel and Spa, our job was to ensure the hotel's interior property designs would complement the natural flow of space. Using the principle of geometrics to aid our designs, we created contemporary artworks for key waiting areas, imbuing these spaces with what Lan Hotel seeks to offer its guests – a sense of fun, decked with modernity and ease. Quiet bedroom pathways are brought to life, with clean and elegant lines of colours.
